About Me

Lead Software Engineer specializing in the architectural design and end-to-end execution of AI-driven platforms, production-grade MCP servers, and agentic workflows. Demonstrated ability to collaborate with sales, marketing, and data teams to analyze unique business problems and build solutions.

Technical Skills

Languages

- Python
- JavaScript
- Ruby
- SQL

Frameworks & AI

- Django, FastAPI & Rails
- React/Next.js & Tailwind
- MCP Servers & Agents
- RAG & Vector Search

Data & Cloud

- AWS (EC2, ECS, Elastic Beanstalk, RDS, EFS)
- Snowflake & PostgreSQL
- GCP & BigQuery

Professional Experience

RADaR Analytics — Columbia, MO (Remote)

Lead Software Engineer — July 2026 – Present

- Designing the system architecture of CPA v2, an enterprise platform engineered to replace legacy Tableau reporting with dynamic, LLM-generated live dashboards with a chat interface.
- Leading migration of a legacy backend infrastructure from Snowflake to AWS RDS.
- Architecting a migration of all legacy full-stack applications into FastAPI and Next/React.js monorepos to implement agentic engineering workflows.

Software Engineer — August 2025 – July 2026

- Architected and built Campaign Performance Assistant (CPA) v1, a production-grade Text-to-SQL chat interface utilizing RAG pipelines and data embedding/vectorization.
- Partnered with marketing teams to develop interactive D3.js performance dashboards, surfacing key metrics such as CTR, spend efficiency, and top-performing ad traits.
- Engineered multi-source marketing data integrations, optimizing Snowflake schemas and implementing automated error recovery for natural-language queries.
- Developed a server-side orchestration layer for agentic chat workflows, managing complex message routing, persistent conversation memory, and asynchronous agent invocation.
- Orchestrated scalable application deployments across AWS Elastic Beanstalk, EC2, ECS, and EFS-backed persistence.

A Cut Above Uniforms — Denver, CO

Technical and Sales Operations Lead (Software Engineer) — April 2024 – July 2025

- Resolved a critical legacy ERP tax bug by engineering Python auditing scripts, uncovering two years of discrepancies and driving the recovery of over $270,000 in overpaid sales tax.
- Engineered automated data pipelines with Python, Google Analytics, and Matplotlib to streamline marketing and sales reporting, eliminating the need for a $10,000/month marketing consultant.
- Led redesign of our e-commerce website, achieving an 8% increase in conversion rates and enhancing tracking fidelity across digital marketing channels.
- Developed custom Acumatica ERP automations in JavaScript to trigger real-time order notifications with Klaviyo.

HoundDog **Columbia, MO (Remote)**

Software Engineer December 2022 – October 2023

- Developed a CRUD-based message board in Ruby on Rails, enabling clients to communicate directly within the application.
- Integrated Twilio and Brevo APIs to send automated text and email alerts to subcontractors regarding certificate submissions, updates, and expirations.
- Built dynamic forms using Ruby on Rails and Bootstrap, allowing subcontractors to submit business liability certificates to contractors.

Unum Insurance Group **Portland, ME**

Insurance Specialist November 2019 – August 2022

- Automated manual payment calculations using Excel macros, reducing payment processing time by 25%.
- Calculated and processed benefit payments while ensuring compliance with payroll and tax regulations.
- Collaborated with finance and claims teams to resolve discrepancies, improving customer satisfaction and processing speed.

ALPS Funds **Denver, CO**

Accountant April 2018 – June 2019

- Calculated daily net asset values and reconciled client holdings for mutual funds, ensuring accurate financial reporting.
- Gained proficiency in Excel-based accounting and Bloomberg Terminal.

BANKR App **Denver, CO**

Co-Founder April 2016 – April 2018

- Led the design and UI/UX for a mobile banking application, from wireframes to working prototypes.
- Managed Agile development cycles, ensuring alignment between engineering and product vision.
- Led business development and marketing strategy.

Education

General Assembly - Remote **2022**

Software Engineering Immersive

University of Missouri - Columbia, MO **2005 - 2009**

BS, Business Administration

Czech University of Life Sciences - Prague, Czech Republic **2008**

International Business, Study Abroad
